EDGE LIVE YOUR ONLINE ENERGY PORTAL

We're all about providing a tailored and specialised service to our clients. But we also know you often need quick access to information regarding your energy consumption and spend. This is why we've developed Edge Live.

Edge Live is a secure, cloud based information portal that gives you instant access to contracts, portfolio information, reports, data and so much more. The portal provides you with the information you need to make informed choices for your business.

Edge Live: Dashboard

Interactive Dashboards

Use interactive graphical dashboards to view your consumption and costs. The functionality of the dashboard allows you to drill down to specific sites/ regions, or filter the data to specific criteria that is important to you. If you require more information than the standard dashboard provides, bespoke dashboards can be prepared for you in conjunction with our inhouse IT Team and your dedicated Portfolio Manager.

Counterparty Contracts

Restructures or changes within your business can mean a mad scramble to locate counterparty contracts when you're reviewing your rights and obligations. Edge Live keeps this information in a central, secure location available to registered users within your business.

Portfolio Information

Save time by having your portfolio information available in one place. From basic site particulars through to important pricing data, Edge Live allows you to quickly access information you need.

- Site Address
- National Metering Identifier (NMI)
- Counterparties (Retailer, Metering Provider)
- Tariffs
- Loss Factors

Get the information you need with a system that allows you to view individual sites or your entire portfolio.

Edge Live: Reports

Reports

Choose the way you want to receive information from us. Reports can be delivered by email from your Portfolio Manager, or accessed through Edge Live.

All of your current and historical reporting will be stored in Edge Live to be available to you when you need it. The search function makes it easy to locate relevant reports quickly and easily.

Data

View 30-minute consumption or generation data for your site at the click of a button. Edge Live doesn't replace the reporting and analysis we conduct for your site, but it does give you immediate access to your site's data and information needed for quick decision making.

In addition to this, you will also have viewing access to National Electricity Market (NEM) spot price data up until the previous trading day.

For customers who have meters with communication capabilities, your Edge Live account may also include live data.
